

➤ The African Consultancy Firm for Africa.

“We challenge ourselves to apply fresh thinking and to utilise our experience and technology in pioneering new ways to deliver forward-thinking solutions.

Innovative Business and Technical Consulting Services and solutions for the Mining and Capital Intensive Industries.

Due to VBKOM's diverse pool of expertise, we can offer our clients specialised skills with a one-stop shop culture. Our engineering, risk and project management capabilities as well as simulation and decision support expertise, makes us an ideal partner to the mining, petro-chemical, agricultural and construction industries.

Our focus on long-term client relationships combined with our technical skills ensures that our clients can fully optimise their value-chain.

We know Africa and the challenges it can offer capital intensive industries. We are logistically suited to service and support our clients in their endeavours.

VBKOM Areas of Expertise:

GEOLOGICAL CONSULTING

We have experience in various commodities including coal, copper, heavy mineral deposits, iron ore, industrial minerals, diamonds, manganese, rare earth deposits, platinum, gold and tungsten all over the African continent. We offer a wide variety of technical and consulting geological services to exploration companies, investors, as well the broader mining industry.

MINING ENGINEERING

Our team combines the strengths of a wide base of practical operational experience with extensive mine planning skills in virtually all the industry-leading software packages along with expert scripting and programming skills. As a result, VBKOM can offer innovative, tailor-made yet trusted mining engineering solutions for Junior Miners to listed corporate entities.

METALLURGICAL ENGINEERING

VBKOM's metallurgical consulting services focus on optimising the extraction of minerals, identifying niche markets, and supplying independent, fit-for-purpose solutions to maximise value for the client.

INDUSTRIAL ENGINEERING

We are driven by our goal to optimise complex processes and systems. We are focussed on improving and integrating people, processes, technology and infrastructure on capital intensive projects to brown fields operations across all levels and formats: plant infrastructure and logistic channels including air, rail, road, seaborne, warehouse, stock yard, and data and information-flow.

- Simulation and Decision Support
- Operational Readiness
- Financial Modelling

PROJECT MANAGEMENT AND -SUPPORT

Our range of field-tested, yet practical project management and -support services and toolsets coupled with our internationally accredited staff will ensure that your project or feasibility study is scoped and planned correctly, that process controls are in place, and that critical documentation is on hand to support you in your efforts to achieve project delivery success.

- Project Support
- Risk Management

TRAINING

VBKOM aims to promote excellence in engineering and project management by providing high quality consulting services and training.
