

# GLOBAL COPPER DEPOSITS

[www.vbkom.com](http://www.vbkom.com)

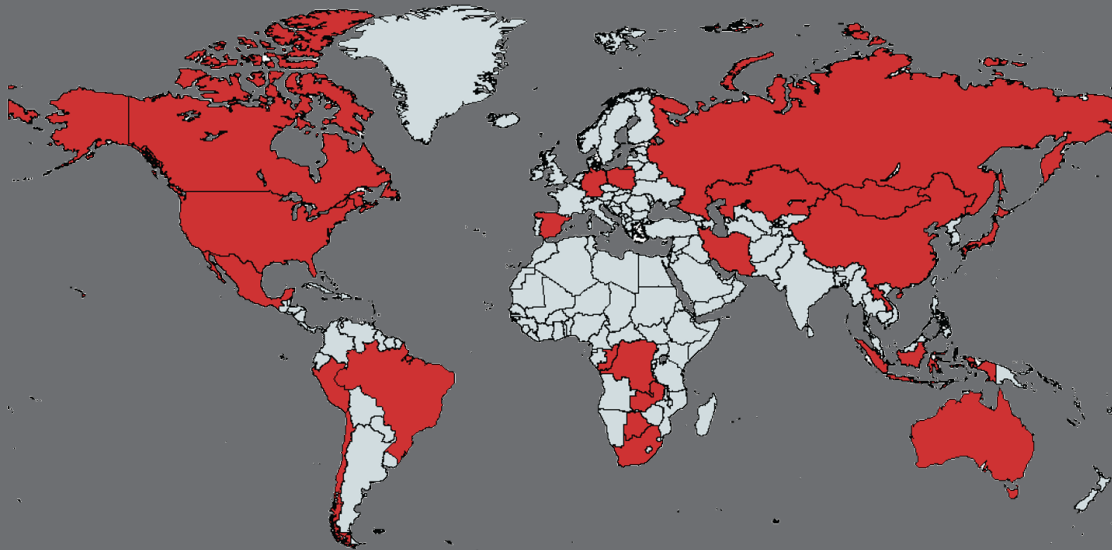

## COPPER

Earth holds an estimated total of 6.3 billion tonnes of discovered and undiscovered Copper. This would fit into a cube with 890 metre sides.

## Where Copper is mostly found in the world

## How VBKOM assists clients to develop Copper deposits

- Code Compliant Reporting (CPR)
- Exploration Planning & Programme Management
- Geological Modelling and Mineral Resource Estimation
- Pit Optimisation
- Mine Design & Production Scheduling
- Equipment Studies & Cost Modelling
- Metallurgical Testwork Analysis
- Process Design & Optimisation
- Process Simulation Modelling
- Product Mix Optimisation
- Capital Project Management
- Feasibility Study Integration
- Operational Readiness
- Financial Evaluation
- Dynamic Simulation
- Risk Management (QRA, HAZOP)

We've been delivering a variety of services to our copper mining clients for more than a decade.
