

# HEAVY MINERAL SANDS

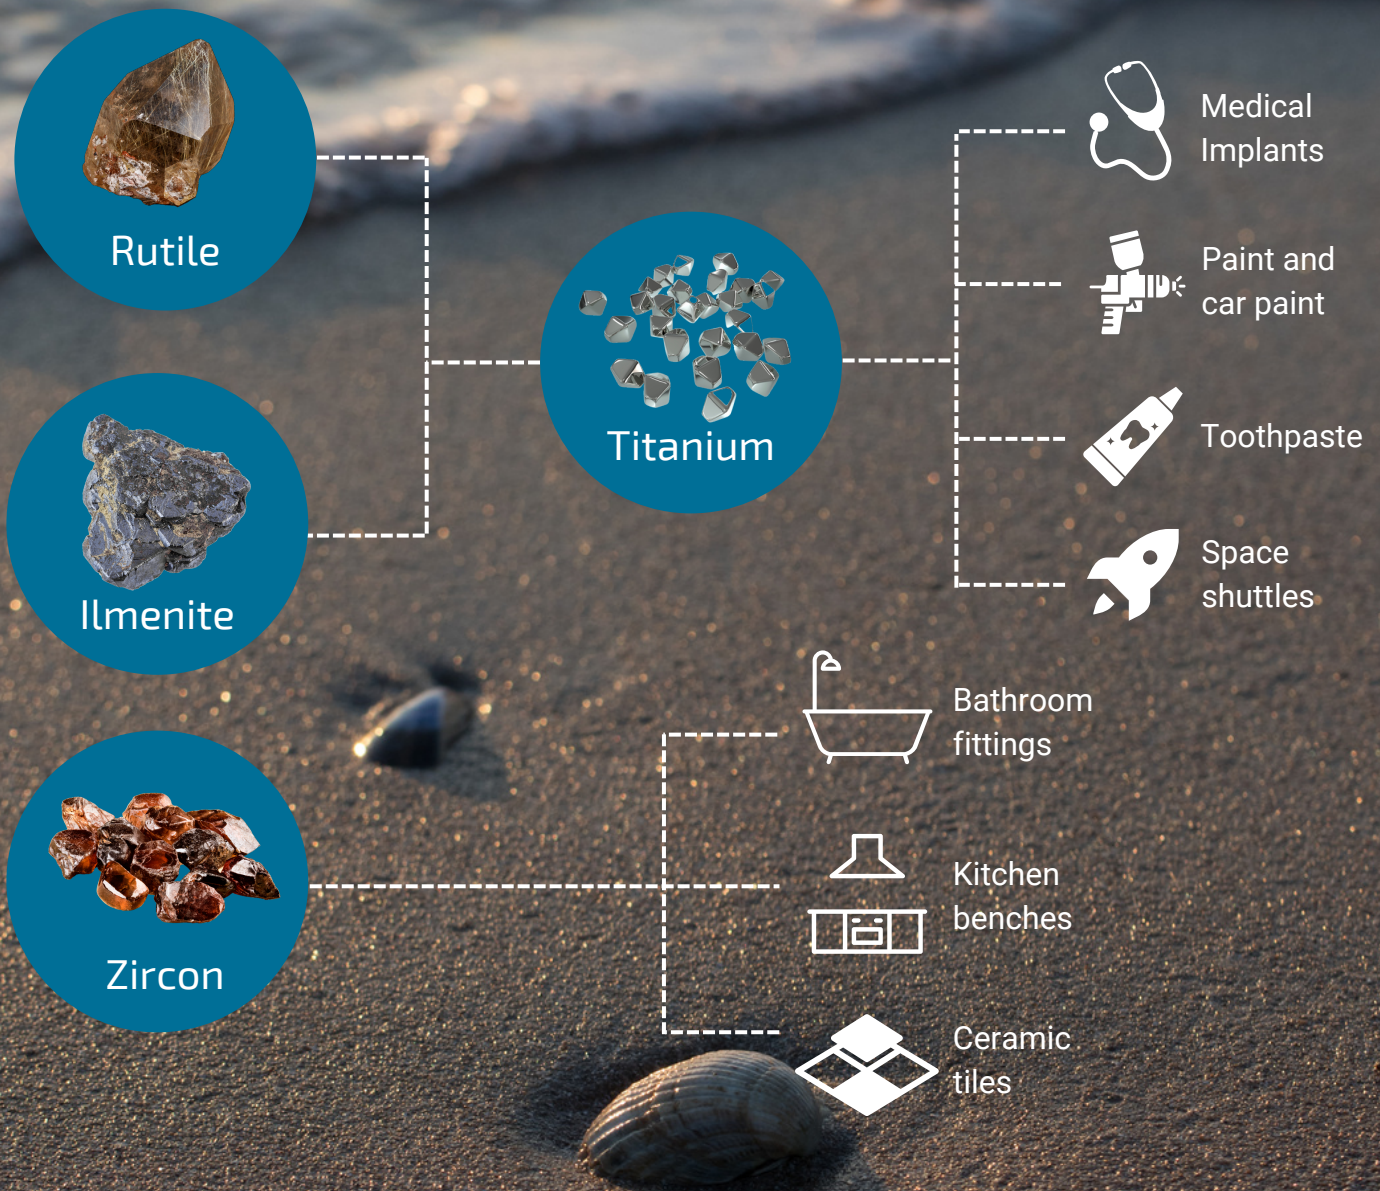

[www.vbkom.com](http://www.vbkom.com)

HMS

Next time you are at the beach, have a closer look at the sand... Heavy mineral sands are a group of minerals such as rutile, ilmenite, and zircon formed by ancient beach, river or dune sands.

Mineral sands form the base of everyday items used in modern life.

Mineral sands and heavy mineral sands are used in everyday consumer goods.
