

Project Support.

Supporting Projects from Concept to Operation.

VBKom's Project Management expertise assists clients to consistently apply best practice project management principles to support the development effort across multiple phases, whilst complying with quality standards and industry codes, all within the constraints of limited time and financial resources.

We are well versed in managing multi-disciplinary study projects by means of company-specific asset development compliance frameworks and processes.

Our services include:

- › Project Scoping and Work Breakdown Structure Creation
- › Project Planning and Controlling: Scheduling, Tracking and Reporting Progress
- › Project Cost Management
- › Project Risk Management
- › Project Communication
- › Procurement Scope of Work Definition and Execution
- › Project Integration
- › Project Administration and Documentation Management
- › Project Organisational Structuring
